

**Survey Distributed to Attendees of the SCCC Rising Sea Level Forum  
June 25, 2009, Melbourne Beach Community Center, Florida**

**Please complete each of the following by circling the best response:**

1. Prior to this Forum, my level of knowledge regarding climate change and especially sea level rise was:      Low              Moderate              High
  
2. The information provided during this Forum clearly demonstrates sea level rise projections are based upon sound science:  
         Strongly disagree    Disagree    No change    Agree              Strongly agree
  
3. The information provided during this Forum has helped me understand how we might adapt to sea-level rise:  
         Strongly disagree    Disagree    No change    Agree              Strongly agree
  
4. I would support local government actions designed to quantify of the effects of climate change including rising sea level:  
         Strongly disagree    Disagree    Not sure    Agree              Strongly agree
  
5. Climate change is real and happening now:  
         Strongly disagree    Disagree    Not sure    Agree              Strongly agree
  
6. Regardless of the cause of climate change and rising sea level, we must take action to minimize its effect on our quality of life:  
         Strongly disagree    Disagree    Not sure    Agree              Strongly agree
  
7. I would support a local "willing seller" program to purchase vulnerable beachfront properties, restore site ecology, and increase public access:  
         Strongly disagree    Disagree    No change    Agree              Strongly agree
